

ANDERSMANKERT

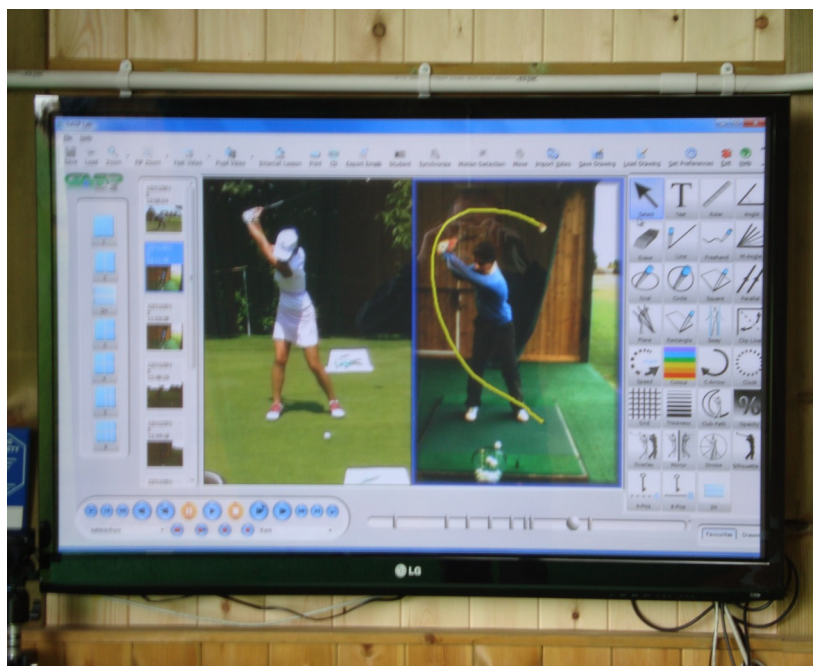

PGA GOLF PROFESSIONAL

Anders Mankert would like to welcome golfers of all ages and ability to his brand new training facility at Cosby Golf Club.

The facilities here are second to none and it is the only training centre in the United Kingdom that offers "Gasp High Speed Technology." Gasp high speed technology allows Anders to film his students using state of the art cameras and software, this technology means Anders can film your swing at 200 frames per second which allows for crystal clear images on playback meaning there are no blurred images when you are viewing your swing. The technology Anders uses allows him to play your swing back on the big screen and also to use split screen technology so you can compare it to the pro's.

Anders initially of Kilworth Springs where he taught recent seniors tour winner Gary Wolstenholme, made the move to

Split screen technology allowing Meghan to compare her swing to Michelle Wie.
